

AIP Transboundary PIDA Water Investments

In February 2021 during the 34th Ordinary Session Assembly of the African Union, African Heads of State and Government adopted the Continental Africa Water Investment Program (AIP), as part of the second phase of the Africa Union Development Agency's Programme for Infrastructure Development in Africa Priority Action Plan (PIDA PAP2, 2021-2030). The AIP Transboundary PIDA Water Investments Support Programme is one of the support programmes of the AIP.

PIDA is the Programme for Infrastructure Development in Africa, a multi sector programme dedicated to facilitating continental integration in Africa through improved regional infrastructure. PIDA is a joint initiative of the African Union Commission, the New Partnership for Africa's Development Planning and Coordination Agency, and the African Development Bank.

The goal of the AIP Transboundary PIDA Water Investments Support Programme is to promote job creation through accelerated planning, preparation, financing, and implementation of regional and transboundary water investments. The overall objective of the Support Programme is to strengthen the enabling environment for planning, project preparation and financing of integrated regional, transboundary water investments that are coordinated with investments in energy, food health, ecosystems, and Covid-19 regional recovery plans.

With over 54 shared river basins in Africa, cooperation in the management and development of transboundary water resources is a key building block towards regional and economic integration. However, the pace of investment in transboundary water projects in Africa remains very slow hampering progress towards the continent's economic growth aspirations and 2030 SDG targets.

The AIP Transboundary PIDA Water Investments Support Programme will accelerate preparation and implementation of climate resilient and gender transformative PIDA Water and other priority transboundary water investments for job creation, industrialisation, and SDG implementation.

Outcomes of the Transboundary PIDA Water Investment Support Programme by 2025

USD10 billion

water-related transboundary investments leveraged from government and private sources

- 2 million indirect jobs and 250,000 direct jobs created for vulnerable and poor
- Integrated corridor multipurpose source-to-sea approach is adopted and implemented by transboundary institutions

Bankable projects

prepared, access to finance accelerated through public-private partnerships and blended finance instruments

- Regional water investment programs and priority action plans developed and under implementation
- Food Nexus Operational
 Framework adopted by African
 Union member states
- At least 5 transboundary agreements and 5 transboundary institutions strengthened to coordinate water investments
- Regional investment in water and sanitation integrated into regional Covid-19 recovery efforts
- ▶ 100 million people benefit

AIP Transboundary PIDA Water Investments Support Programme Components

O1 CATALYSE leadership and commitment for transboundary cooperation and integrated water investments

WORK PACKAGE 1: Support shared visioning for transboundary cooperation and integrated regional water investments

WORK PACKAGE 2: Support institutional development of river basin organisations, identify barriers to preparation of bankable projects

WORK PACKAGE 3: Develop business cases for regional integrated corridor approaches in the preparation of transboundary water investments and motivate financing for project preparation

MOBILISE partnerships and capacity for planning, preparation and implementation of transboundary projects coordinated with investments in water, energy, food, ecosystems, and health

WORK PACKAGE 4: Map partnerships, policies and capacities for preparation of bankable transboundary projects WORK PACKAGE 5: Strengthen collaboration among RBOs and establish Africa transboundary water platform for knowledge sharing, capacity development in international water law, project preparation and financing

WORK PACKAGE 6: Apply the Water Investment Scorecard to monitor progress made on transboundary water investments and identify priorities for unlocking bottlenecks and building capacity

ACCELERATE access to early stage project preparation and transaction advisory services of identified priority AIP-PIDA water transboundary projects, and document processes for agile learning, monitoring and evaluation

WORK PACKAGE 7: Develop regional transboundary water investment programmes coordinated with investments in water, energy, food, health and ecosystems/nature-based solutions WORK PACKAGE 8: Accelerate support to early stage project preparation and transaction advisory services across the project preparation value chain WORK PACKAGE 9: Establish programme coordination, Moniting & Evaluation systems for project implementation, and ensure experiential learning

Implementation

The total budget for programme implementation in 18 countries and 5 river basins is USD 25 million from 2020 to 2025. Two categories of projects will be supported.

01 Transboundary water projects prioritised by Lake and River Basin Organisations and Regional Economic Communities

Prioritised transboundary and regional projects in all Africa Regional Economic Communities. The following lake and river basins have been prioritised for initial support: Volta Basin in West Africa, Lake Chad, Lake Victoria/Kagera, North-Western Sahara Aquifer System, Okavango, Limpopo, Orange-Senqu and Zambezi Basin.

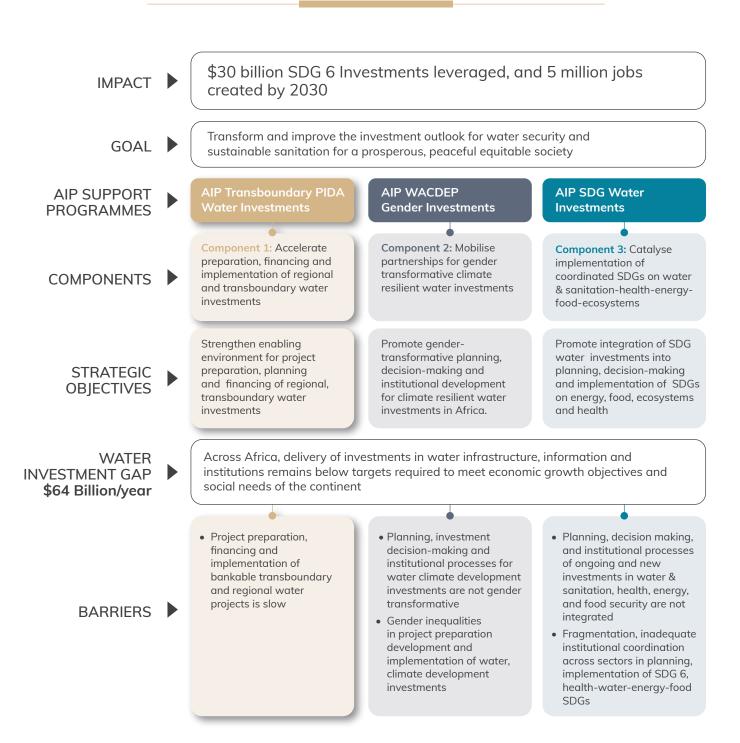

02 Priority Transboundary PIDA water projects adopted by the AUDA-NEPAD

Transboundary water projects under the Programme for Infrastructure Development in Africa (PIDA). A secondary objective is the application of the water-health-energy-food security nexus approach to transboundary hydropower projects to realise tangible regional development benefits.

The AIP Transboundary PIDA Water Investments Support Programme is executed by the Global Water Partnership, the African Union Development Agency -NEPAD, the African Development Bank, the African Ministers' Council on Water, River Basin Organisations, and others.

The programme is implemented with technical support and backstopping from the AIP Secretariat hosted by Global Water Partnership Africa Coordination Unit.

The AIP at a glance

Scope	Africa: At least 18 Countries and 5 River Basins
Duration	2020-2030
Goal	To transform and improve the investment outlook for water security and sustainable sanitation for a prosperous, peaceful, and equitable society
Overall Objective	The objective is to enhance job creation through gender sensitive investments in water security, sustainable sanitation, industrialisation, and climate resilient development.
Impact	 \$30 billion leveraged by 2030 towards climate resilient water and sanitation related investments 250 million people benefit from resilient water investments and economic opportunities 4 million indirect jobs for vulnerable, poor youth, women and girls 1 million direct jobs created through climate resilient water and sustainable sanitation
Targeted Outcomes	 Regional, national water investment programmes developed and under implementation African Union governance framework for water- health-energy-food-ecosystem nexus adopted AIP Water Investment Scorecard developed and operationalised Business cases for water investments and profile of water in economy strengthened Job Creation Toolkit developed and operationalised by the African Union Development Agency Gender transformative investments in water, climate, and development developed and integrated in national development and Covid-19 economic recovery plans Bankable water projects prepared, and finance leveraged at transboundary and national level Delivery of critical water infrastructure accelerated, addressing the water-health-energy-food-ecosystems nexus and meeting the needs of water dependent growth sectors and the poor
AIP Support Programs and strategic objectives	AIP Transboundary PIDA water investments Accelerate project preparation, finance and implementation of regional, transboundary water investments AIP Water Climate Development and Gender (AIP WACDEP-G) Mobilise partnerships and implement gender-transformative investments in water climate development AIP SDG Water Investments Catalyse commitment and leadership for coordinated climate resilient SDG water investment toward inclusive growth, jobs and Industrialisation High Level International Panel for Climate Resilient Water Investments in Africa Mobilise high level political commitment and leadership for water investments, peace and security
Activities	 Establish a high-level international leadership Panel and mobilise political commitment for climate resilient, gender transformative water investments aligned with SDGs on water, energy, food, health and Covid-19 economic recovery plans Develop regional, national climate resilient water security investment programmes to improve the investment outlook for water and sanitation as key inputs to employment creation and inclusive growth Develop business cases for investments in SDG 6 and undertake economic analysis to determine the real value of proposed investments and their related costs and benefits Support countries to integrate water security, gender transformative climate resilience investments in development planning and budgets Develop an AIP Water Investment Scorecard to assist countries benchmark progress in water investments Develop partnerships, capabilities, knowledge for improved governance and coordination of gender transformative SDG 6 investments with related targets on energy, food and health Provide transaction management advisory services and technical assistance in early stage preparation of bankable water projects at regional, transboundary and national level Provide transaction management advisory services and technical assistance in early stage preparation of bankable PIDA transboundary water and hydropower projects Promote regional integrated regional corridor approach in planning and implementation of transboundary water projects Convene annual water investment summit, mobilise finance for bankable projects
Management, coordination and implementing partners	 GWP (executing), AUDA-NEPAD, African Development Bank, Development Bank Southern Africa, African Ministers' Council on Water, Africa Water Facility, The Infrastructure Consortium for Africa, UNDP, other partners Governments, Regional Economic Communities (RECs), River Basin Organisations (RBOs)
Funding and Budget	• \$75 million: GWP Finance Partners (Austria, SIDA, SDC, EU) Green Climate Fund, Global Environment Facility, Adaptation Fund Development Bank Southern Africa, national governments and other donors
