

# Contributions to better water resources management

## MALI

- Integrating IWRM into the Strategic Framework for Growth and Poverty Reduction (2007–2011)
- Development and adoption of a national water policy
- Encouraging stronger commitment from donors to the water sector
- Developing stakeholders' capacities in water-related sectors
- Helping to establish a network of journalists to promote IWRM
- Developing an IWRM Plan

## ETHIOPIA

- Development and adoption of the Berki Basin IWRM Plan
- Defining concrete measures for ensuring water security (legal, institutional, financial and technical)
- Resolving conflict among water users
- Making communities more aware of shared water management issues

## ERITREA

- Developing regulations for the issue of water-use permits and building of water infrastructure
- Developing water quality guidelines
- Producing a draft national water policy and proposing a new institutional framework
- Developing an IWRM situation analysis, IWRM strategy, updated water law and institutional framework for the IWRM plan
- Developing an IWRM Plan

## SENEGAL

- Supporting decision making through facilitating multi-level stakeholder involvement
- Helping stakeholders gain better understanding of IWRM issues
- Providing capacity building in problem solving and communication
- Developing an IWRM Plan

## CAPE VERDE

- Developing a legal framework for water resource administration and strategies for water financing
- Reviewing and updating water quality standards
- Encouraging a national discussion on water pricing
- Developing an IWRM Plan

## BENIN

- Revising the Poverty Reduction Strategy Paper (PRSP) to include a cross-sectoral approach
- Developing a new water policy and water law incorporating IWRM principles
- Securing the future of the Okpara dam (a major source of drinking water)
- Raising government awareness of climate change in national policies and legislation
- Developing a draft IWRM Plan

## CAMEROON

- Conducting water resource situation analysis and developing strategic options for water management
- Incorporating IWRM in the national strategy for water and land
- Making provision for the national IWRM programme within the water ministry budget
- Conducting capacity building in different aspects of water management including conflict resolution

## MALAWI

- Integrating IWRM into the Malawi Growth and Development Strategy
- Mobilising political will and awareness among key actors
- Promoting revision of the water law and water policy
- Influencing adoption of an integrated approach in the second National Water Sector Development Programme
- Developing an IWRM Plan

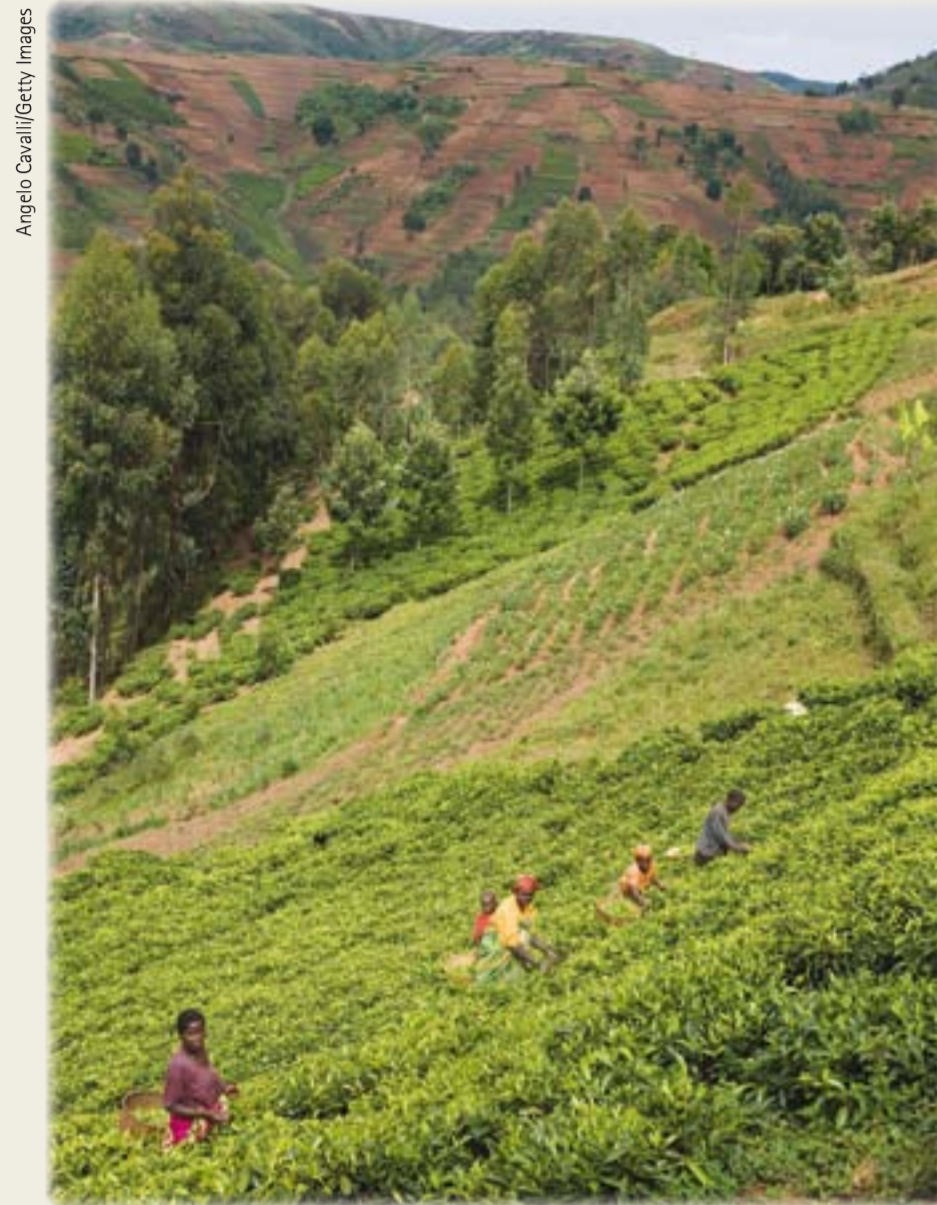

## ZAMBIA

- Integrating IWRM into the Fifth National Development Plan
- Assisting in the revision of the 1948 Water Law and the 1994 Water Policy
- Enhancing sector collaboration during implementation of water related programs
- Helping strengthen the coordination mechanism for water related programmes across government ministries, donors and other stakeholders
- Developing an IWRM Plan

## SWAZILAND

- Broadening stakeholder participation and facilitating set up of river basin associations
- Broadening focus of the water master plan and strengthening links with national development priorities
- Ensuring inclusion of IWRM in the draft water policy
- Developing a financing strategy to support implementation of the plan
- Improving access to clean drinking water for more than 9,600 people in the Kalanga community
- Developing a draft IWRM Plan

## BURUNDI

- Inclusion of IWRM in the national water policy
- Conducting water resource situation analysis and increasing knowledge on water development for economic growth
- Influencing institutional reform
- Developing an IWRM Plan

## KENYA

- Promoting collaboration between the water ministry and potential financing institutions to support projects within the IWRM Plan
- Strengthening links between government, civil society and the private sector
- Influencing development processes in the water sector through participation in sector reviews and PRSP processes
- Encouraging broad ownership of the IWRM plan among key stakeholders
- Developing an IWRM Plan

## MOZAMBIQUE

- Supporting development of an issues paper and identifying emerging critical water issues not covered in earlier national water resource strategy
- Developing guidelines for integrating water in PRSPs
- Developing strategic options for water financing
- Developing strategic options for mainstreaming gender in IWRM planning and implementation
