## 1 Framework for analysis

The GWP strategy describes the various areas of work to be undertaken by the GWP during the period 2009-2013 (see below **graph A**). A simple model of “GWP change theory” has been developed in the 5-years GWP Work Programme in order to highlight the value chain going through these various areas of work and communicate /understand the rationale of GWP business (see below **graph B**).

In accordance with the outcome mapping approach, GWP reporting rests on two legs: (i) activities implemented and (ii) outcomes/changes observed in the GWP environment, which can plausibly be linked to the activities.

- **The “activities”** that GWP undertakes in order to foster changes in the water sector are thematically related to the 18 “strategic elements” highlighted in GWP strategy. Furthermore, the activities can be described via a basic typology describing the GWP network main modes of intervention: i.a. process facilitation, capacity building, awareness raising or knowledge management on IWRM (see section on activities below).
- **The “outcomes” or “changes”** that GWP would like to see happening in the water sector are formulated in the form of **outcome challenges** and **progress markers**. They relate to each of the 4 goals and can therefore be connected to GWP value creation chain (see section on outcome below)

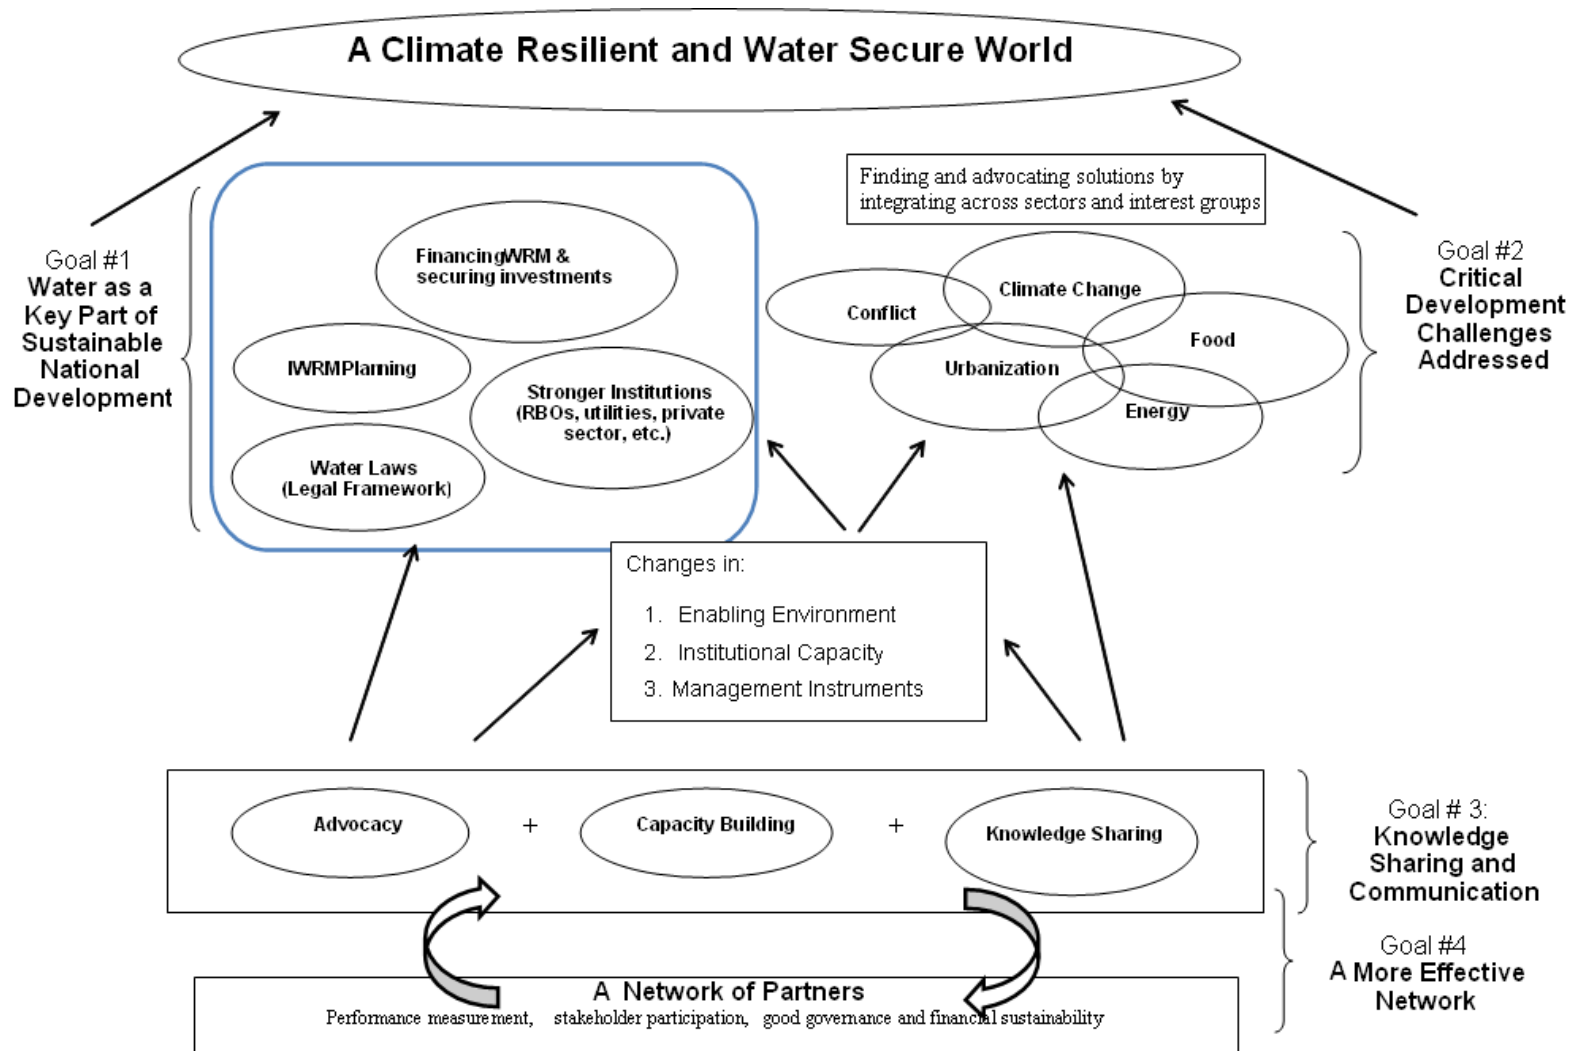

The discussion of both aspects and their linkages in a structured manner is necessary for an informed monitoring. This may be of particular importance mid 2011, at the mid point of the 2009-2013 Strategy period<sup>1</sup>.

---

<sup>1</sup> Will feed into the planned mid-term Strategy external evaluation

**Graph B) The storyline: “Value creation chain” from network to impact, via knowledge management and water governance reform**

## 2 Overall assessment

### 2.1 On achievements

The **2010 Annual Report** provides an overview of the activities undertaken by the GWP network (GWPO Secretariat, including the Technical Committee, and the 13 Regions) in 2010 and the main outcomes achieved. These activities largely proceeded according to the GWP 2010 workplan prepared and approved in 2009. The outcomes are still difficult to assess against the pre-identified “progress markers” (see section below on monitoring function); nevertheless, the information reported shows a **satisfactory level of results under the 4 goals**.

The various thematic areas mentioned in the strategy (referred to as “strategic elements”) are explored with different emphasis depending on the regions. Overall, “water and climate” related activities received a high level of attention in 2010. In terms of types of activities, 2010 was in line with GWP network traditional portfolio, in particular the emphasis on capacity building.

### 2.2 On the monitoring function

GWPO uses mainly **three reporting mechanisms** to monitor results (mainly activities, but also outputs and outcomes) by the GWP network<sup>2</sup>:

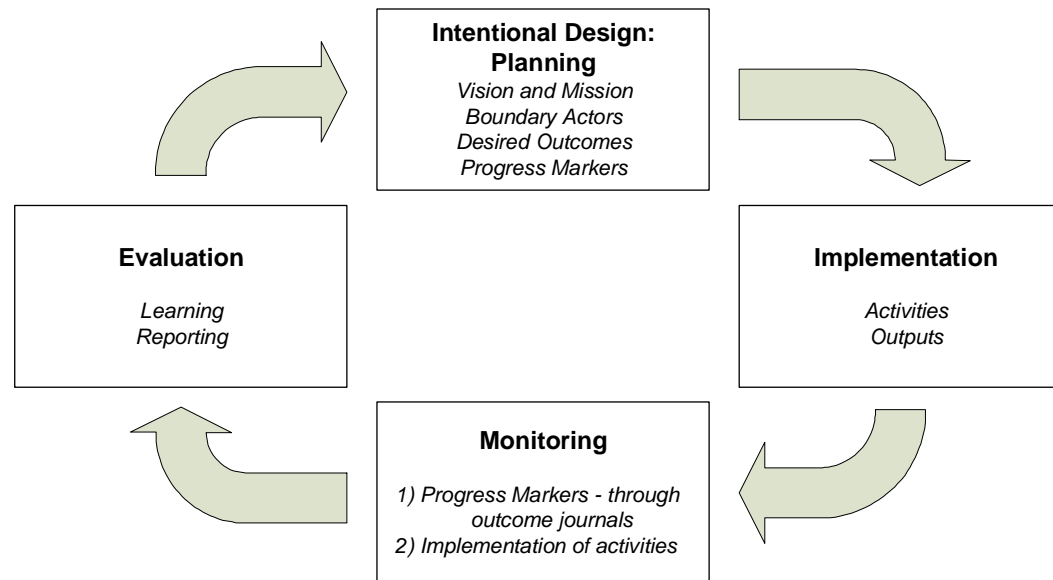

1. Monthly narrative reports. These reports are produced according to criteria established by the GWPO Communications Unit mainly for the monthly newsletter (NewsFlow).
2. Quarterly financial reports. These reports are produced according to criteria established by the GWPO Finance and Administration Unit mainly to monitor and approve financial disbursements.
3. (Semi) annual reports on monitoring of progress markers. This report was introduced only in 2010 following discussions at the September 2010 Regional Days. The objective is to further operationalize the Outcome Mapping approach through reporting against the progress markers established by most regions in 2009 and revisited every year at the annual planning stage. Only one report of this type has been produced (end 2010).

Based on this information, GWPO produces its **Annual Report** and various communication materials including a monthly Newsletter (**NewsFlow**).

Work on improving the GWP **monitoring function** is underway, as planned in 2009 with the introduction of the “programming cycle” concept.

---

<sup>2</sup> Produced by all GWP entities (GWPO, including the Technical Committee & RWPs). In addition, detailed activity reports are provided to the governing bodies and detailed project reports to the sponsors when relevant.

### GWP's Outcome Mapping-based Programme Cycle

The basic information provided through the various reporting mechanisms has been standardised, indexed and compiled in a database format. The analysis of 2010 monitoring information suggests that there is still room for improvement. A few areas needing further work are highlighted below:

- There may still not be a full understanding of the *connections between the different reporting mechanisms* (i.e. that they all feed into each other conceptually Monthly Report>Progress Markers Report>Annual Report); a proper realization of the underlying coherence and appropriate routines would ease a lot the reporting tasks and reduce overlaps.
- There is room for improvement in terms of *formulating progress markers* (at the planning stage); some are too vaguely formulated or too ambitious; this insight calls for taking the reporting function very seriously in order to learn and adapt for the next cycle of workplanning.
- There is no clear/consistent understanding of the *underlying framework or “GWP theory of change”* supporting the reporting materials which renders the task of communicating results / telling stories about achievements difficult<sup>3</sup>.
- There is still insufficient *use by GWPO Secretariat of the information* reported, for the purpose of learning about GWP thematic breath and achievements.

A “snapshot” of the available reporting information is provided in the Annex for the 13 regional workprogramme as well as the global workprogramme.

<sup>3</sup> This point is addressed in next para.

### 3 Reporting on activities

This section concerns the monitoring of **GWP activities** (obtained from the statements provided in the monthly reports). The collection of the monthly reports statements constitutes a database comprising about 550 entries per year (530 for 2009, about 550 for 2010). The basic elements of the database structure are provided below.

#### 3.1 Structure of GWP activities

The information contained in the statements can be broadly interpreted along two main classifications suggested below<sup>4</sup>.

##### 1. The 18 “GWP strategic elements” listed in GWP strategy:

###### Thematic portfolio Goal 1&2

<b>SE 1.1</b>	Improving support for water management through national processes
<b>SE 1.2</b>	Improving governance systems
<b>SE 1.3</b>	Improving water infrastructure
<b>SE 1.4</b>	Improving financing for water management
<b>SE 1.5</b>	Facilitating transboundary cooperation
<b>SE 1.6</b>	Monitoring progress on IWRM
<b>SE 2.1</b>	Climate change
<b>SE 2.2</b>	Food security
<b>SE 2.3</b>	Tackling urbanization + water supply & sanitation + environment <sup>5</sup>
<b>SE 2.4</b>	Resolving conflict

###### Thematic portfolio Goal 3&4

<b>SE 3.1</b>	Improving GWP communication capacity
<b>SE 3.2</b>	Improving GWP outreach
<b>SE 3.3</b>	Strengthening GWP knowledge sharing capacity
<b>SE 4.1</b>	Forging partnerships and alliances
<b>SE 4.2</b>	Measuring GWP performance
<b>SE 4.3</b>	Ensuring GWP financial sustainability
<b>SE 4.4</b>	Supporting GWP network
<b>SE 4.5</b>	Decreasing GWP carbon footprint

##### 2. The 7 “types” of activities referring to GWP main modes of intervention:

<b>process</b>	Report on design / participation to significant planning / reform processes
<b>capacity</b>	Report on targeted activities with a clear purpose in terms of building capacity; training, forum, dialogue, focused Toolbox training
<b>awareness</b>	Report on general activities designed for raising awareness of larger public
<b>products</b>	Report on publications (lectures, books etc) and other products
<b>operational</b>	Report on programme implementation activities such as meetings of project management groups; inputs management
<b>meetings</b>	Report on meetings initiated by GWP for advocacy, designing or advancing a cooperation with partners
<b>part. others</b>	Report on participation / contribution to activities or processes initiated by others

In the table below are some illustrative examples explaining the classification of the statements.

<sup>4</sup> The interpretation remains rough since many statements obviously cross borders within the classifications; illustrative examples are given in annex below

<sup>5</sup> Needs more detailed unpacking

		<i>process</i>	<i>capacity</i>	<i>awareness</i>	<i>products</i>	<i>operational</i>	<i>meetings</i>	<i>part. others</i>
1.1	Improving support for WM through national processes	e.g. High level national roundtables; invitation to join high level processes	(cap. sessions related to Goal1 & Goal2 themes)	(events related to Goal1 & 2 themes)	(publications related to Goal1 & Goal2 themes)	e.g. ref group PAWD	GWP initiative: e.g. RECs, AMCOW, gov. meetings on G1&2 themes	Others initiative: e.g. RECs, AMCOW, gov. meetings on G1&2 themes
1.2	Improving governance systems	e.g. Passing laws	id	id	id			id
1.3	Improving water infrastructure		id	id	id			id
1.4	Improving financing for water management		id	id	id			id
1.5	Facilitating transboundary cooperation	e.g. UNECE process; Drin dialogue	id	id	id		e.g.CICOS	id
1.6	Monitoring progress on IWRM		id	id	id			id
2.1	Climate change	e.g. Danish led process to COP 15	id	id	id			id
2.2	Food security	e.g. setting up rural boards	id	id	id			id
2.3	Tackling urbanization	e.g. Bic river	id	id	id			id
2.4	Resolving conflict		id	id	id			id
3.1	Improving GWP communication capacity				setting up electronic medias; calendar			
3.2	Improving GWP outreach		journalists; youths; teachers	World water day, youth, schools, teachers, roadshow	Videos, issues of newsletters, posters/ displays at for a			General meetings; International fora e.g. World Water Forum,
3.3	Strengthening GWP knowledge sharing capacity	e.g. setting up Lusophone process	general Toolbox training; general IWRM training;		Translations; producing Toolbox cases			
4.1	Forging partnerships and alliances	e.g. Forming national IWRM NGO's group					MOUs; new partners; creation AWP	
4.2	Measuring GWP performance		OM training; LRs					
4.3	Ensuring GWP financial sustainability				fund raising manual	GWP targeted fund raising workshops or events	GWP initiated donors meetings	Others donors meetings
4.4	Supporting GWP network		general sec training		e.g. strategy launch	TC; planning, sec. meetings, nominations, accreditations (CWPs)	CP, SC, boards	
4.5	Reducing GWP's carbon footprint							

### 3.2 How is the GWP system addressing the different strategic elements? (2009 & 2010)

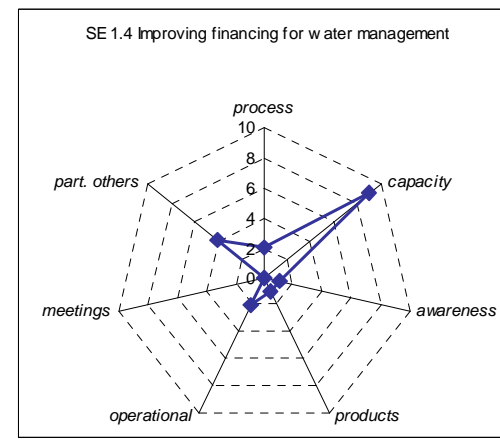

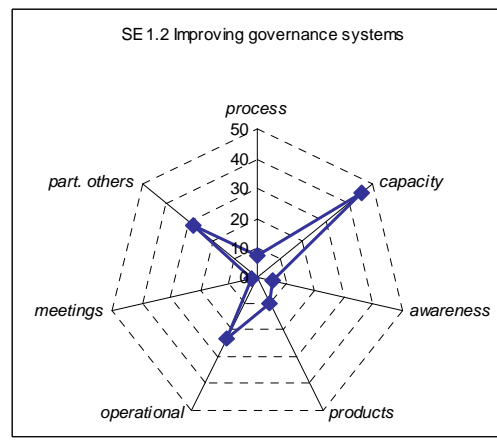

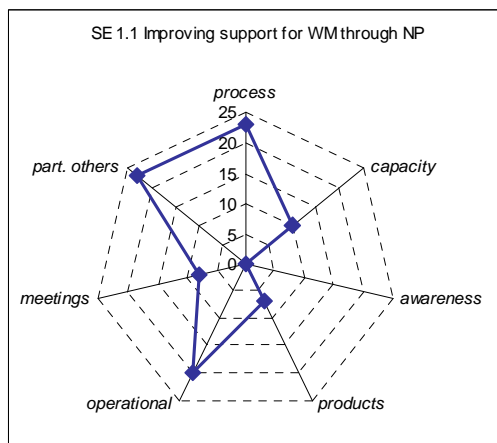

The reporting mechanism for following activities (monthly reports) has been in use and refined for a few years. It is not a systematic reporting against workplans but allows GWP entities to report on the most significant activities completed during a given months in a free format. It still needs some efforts for improvement and harmonization across the network. The statistics below give an overview of GWP intervention pattern in the different “thematic areas” being addressed, based on the number of reported items in each areas.

#### Total number of hits per strategic areas split by types.

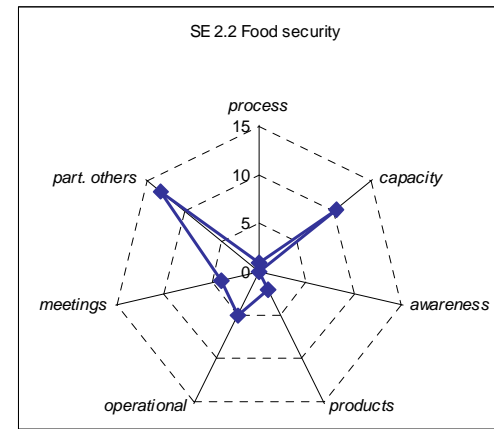

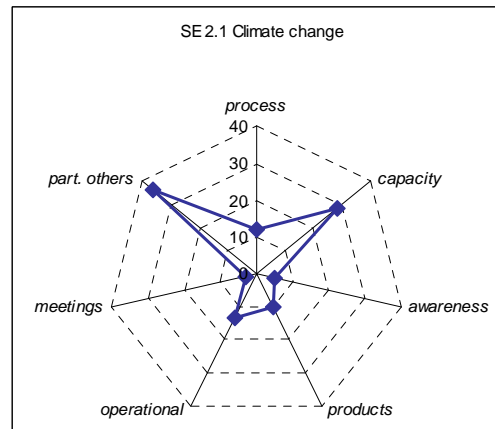

- Blue color (4 shades) represents reports mostly associated with outputs/ outcomes – due to the types of activities reported (**proc, cap, awa, products**),
- Green color is a mix of **operational activities** contributing to a larger project purpose
- Orange color represents GWP initiated **meetings**
- White color represents **participation in others activities**

**Remark:** under the strategic element “tackling urbanization” are recorded a number of different issues (e.g. WSS, environment), which explains the high number of hits.

**SE 1.1. :** Facilitation of reform processes is the preferred avenue to induce outcomes

**SE 1.2. & 1.4:** A lot of workshops/ capacity building

**SE 1.5:** mainly via participation to others processes

**SE 2.1. & 2.2<sup>6</sup>:** Much more activities in climate than food, with similar pattern

## 4 Reporting on outcomes

This section concerns the monitoring of GWP outcomes (obtained from the statements provided in the semi-annual reports on monitoring of progress markers). The data base of GWP progress markers comprises about 400 entries.

### 4.1 Structure of GWP outcomes

Description of changes		Value added at different stages leading to real impact
<b>Goal 4</b>	<b>Boundary actors</b> work as “partners” in a network mode	<b>VA_Goal_4:</b> Contribution of <b>networking arrangements</b> to Impact (often via contribution to Goal 1,2,3 activities)
<b>Goal 3</b>	<b>Boundary actors</b> participate to and benefit from awareness raising, knowledge sharing, capacity building activities on IWRM	<b>VA_Goal_3:</b> Contribution of <b>awareness raising, capacity building, knowledge sharing activities on IWRM</b> to Impact (often via contribution to Goal 1, 2 activities)
<b>Goal 1 &amp; 2</b>	<b>Boundary actors</b> reform their water governance system towards IWRM (working on one or several “ <b>change area</b> ” such as items listed in the ToolBox structure)	<b>VA_Goal_1&amp;2:</b> Contribution of <b>IWRM oriented water governance</b> to Impact
<b>Mission</b>	<b>Boundary actors</b> work within the (IWRM oriented) governance system to address concrete water related problems affecting direct beneficiaries as “ <b>change area</b> ”.	<b>Real Impact on beneficiaries</b>

<sup>6</sup> Remember the scale / number of hits is different on each graph

## 4.2 How is the GWP system influencing boundary actors?<sup>7</sup> (2009 & 2010)

The reporting mechanism for following progress markers has been tested for the first time end 2010<sup>8</sup> and lessons for harmonization of practices across entities and improvement have not been drawn yet. The statistics provided below are therefore indicative and should be treated as illustration / work in progress only (moreover, only progress markers relating to VA Goal 1 and VA Goal 2 have been kept). GWP entities make an analysis of the progress markers pre-identified at the planning stage on a 3 levels scale:

<b>/</b>	Something can be reported about the boundary actor, mostly in terms of connection / interest / participation to GWP activities (10%)
<b>+</b>	A change process is identified while not fully implemented; the discussion of the link to GWP activities is worth reporting (50%)
<b>++</b>	A significant change can be reported; the discussion of the different influences/ processes leading to this change is worth reporting, including the link to GWP activities (90%)

Basic statistics					Examples of boundary actors and change areas as formulated in prog. markers (VA Goal 1 & 2)	
GLOB	PM	/	+	++	Boundary Actors	Change Areas
VA_Goal_4	3	0	1	0	National and Regional Climate Centres	climate services
VA_Goal_3	5	1	1	0	Adaptation Fund	facilitating mechanism
VA_Goal_1	22	7	5	2	UN Water	indicators
VA_Goal_2	0	0	0	0	Media	media vehicles?
<i>Total</i>	30	8	7	2	Multi and bi lateral support	Multi and bi lateral support
					Rio+20	strategy?
					National ministries of finance and planning	water resources management projects
					UNEP and UNDP	adaptation funding
					National governments	adaptation strategies
					GEF, UNDP, UNEP, World Bank, et al. as well as regional and national policy makers	IWRM plans implementation and climate change adaptation plans
					global entities	key documents?
					NGOs such as ICRC and International Alert	programmes
					GEF, UNDP, UNEP, World Bank, et al.	PRSPs, MEAs, NAPAs, Transboundary Basin strategies
					Knowledge partners (UNDP, UNEP, SEI, IIED, CPWC)	adaptation strategies
					UN-ISDR	disaster risk reduction strategies
					OECD	funding
					World Bank, ADB, AfDB	funding
					SIWI	World Water Week
					countries	adaptation strategies
					UNFCCC, UN-Water	institutional Mechanism?

<sup>7</sup> Remember the scale / number of hits is different on each graph

<sup>8</sup> Two regions did not have progress markers in their 2010 workplans and therefore could not fully report. This problem is addressed in the 2011 workplan. One region reported without using the scale.

<b>CAC</b>					<b>Boundary Actors</b>	<b>Change Areas</b>
