Supporting actions in financing

- Increasing direct central government investment backed by good policy;
- Raising revenue from traditional and non-traditional water and ecosystem services;
- Transparency, anti-corruption and accountability;
- Leveraging opportunities from recovery support packages (COVID-19, natural disasters), using IWRM coordination mechanisms;
- Improve coordination and prioritization of funds across “sectors”, identifying win-win investments, for example climate adaptation and poverty reduction;
- Increase and improve coordinated investments from donors and banks.
