Which white paper theme(s) <sup>3</sup> has the activity contributed to?	Water & Agriculture <input type="checkbox"/> Water & Health <input type="checkbox"/> Water & Equitable Allocation <input type="checkbox"/> Water & Climate Hazards <input checked="" type="checkbox"/>
Type(s) of activities <sup>4</sup> predominantly implemented	Process facilitation <input type="checkbox"/> Capacity building <input type="checkbox"/> Awareness raising <input checked="" type="checkbox"/> Meeting organisation <input type="checkbox"/> Knowledge product <input type="checkbox"/>
Lists of main activities proposed by the projects	Create mass awareness among targeted population and youth groups
Governance processes <sup>5</sup> influenced by the activities	

<b>Progress Report</b>		
Reporting period	[[from MM/YY to MM/YY]]	
Activities planned	Results achieved	
	Number of participants (if relevant)	Actions/decisions really done
Activity1 Water Talk Film Festival	More than 250 national and senior international delegates	1-14 films on waste water management, water conservation, water pollution, climate change and drought were screened. 2-This film festival offered an opportunity to share and generate innovative ideas and insight, while recognizing the works of significance by individuals and organizations active in the water resource management in the region.
Activity2 Seminar on Creating Awareness for Water Conservation in Younger Generation		1-Involve youth on various awareness water campaigns 2-Make powerful media campaigns to sensitize and motivate public to take proactive steps 3-Make young generation aware of precision irrigation techniques 4- Involve youth in all existing government programmes aimed at water conservation 5- Include water conservation and sanitation in school curriculum at different levels that will help children to inculcate behavioural change and adopt a 'water culture' at present and future.
Details of youth organisations that have interacted with and exerted influence within the bodies responsible for water resources decisions		
Progress against project objectives including challenges faced and lessons learned <sup>6</sup> (Difficulties and approaches of solutions)		

Notes:

1. The reporting template has been developed to facilitate consistent and systematic documentation of project results. The information requested contributes to the overall GWP M&E system through which progress towards the achievement of the GWP work programme and strategy is assessed. The reporting procedure of the individual projects should, where possible, feed into the existing regional GWP reporting mechanisms (i.e. monthly and annual reporting processes) managed by GWP's Regional Water Partnerships.
2. Information to be taken from original project concept.
3. Ref. *Propositions de la Jeunesse Francophone – Un Paris pour l'eau*
4. GWP's M&E system uses the following standard classification of activities:
  - Process facilitation – *Activities contributing directly to significant planning / governance reform processes*
  - Capacity building – *Targeted activities with a clear purpose in terms of building capacity*
  - Awareness raising – *General activities designed to raise awareness*

- Meetings – *Meetings initiated by the project*
- Participation – *Participation / contribution to activities or processes initiated by others*
- Knowledge products – *Publications and other products*

5. Refers to formal change processes such as policy development, action planning, institutional reform, etc., through which the desired project impact will be achieved.
6. A critical assessment of what was achieved vs. what was planned
