| Description: | Description: | Description: | Description: |
| List key activities to be implemented. | Indicate outputs or tangible results you expect from each activity. | The foreseeable changes that may occur as a result of an activity. Outcomes relate to the changes, often in behaviour and often over the medium-term (sometimes long-term) brought about partly or in whole by the activities of your project. | Any documents, tools, and processes followed to collect the data necessary to measure progress. The data collected may be quantitative or qualitative. How will you measure that intended objectives and outputs are reached? |
