

Integrated Water Resources Management (IWRM) Projects and Initiatives in the Caribbean

Title: Enhancing Capacity for Adaptation to Climate Change (ECACC) in the UK Caribbean Overseas Territories

Organisation: Caribbean Community Climate Change Centre (CCCCC)

Aims and Objectives:

Main objective of the Enhancing Capacity for Adaptation to Climate Change (ECACC) project was to support efforts by the United Kingdom Overseas Territories (UKOT) in the Caribbean to adapt to climate change and climate variability within the context of sustainable development.

The Project allows participating territories to have enhanced capacity to benefit from regional climate change adaptation programmes and initiated the integration of the outputs of these into national development planning processes.

Duration: Start Year: 2007 Completion Year: 2011

Additional Comments:

Estimated Cost (USD): \$485,000

Funding Source: Department for International Development (DFID)

Key Words: Climate Change; Adaptation; Vulnerability Assessment; Policy; Strategy

Global Water Partnership-Caribbean IWRM Projects and Initiatives Database

Geographic Coverage: UK Caribbean Overseas Territories: Anguilla; British Virgin Islands (BVI); Cayman Islands (CI); Montserrat; and Turks and Caicos Islands

Sectoral Focus: National Planning

Target Beneficiaries: National Planners and Policymakers

Outputs:

The objective of the project was successfully achieved including:

1. Establishment of National Climate Change Committees in each of the Overseas Territories (Anguilla, British Virgin Island, Cayman, Montserrat and Turks and Caicos),
2. Development of public education and outreach (PEO) programmes in each Overseas Territory that have been implemented,
3. Completion of their Vulnerability and Capacity Assessment (VCA) using the methodology developed under the MACC Project and Development of climate change policy document for each
