

An Integrated Water Resources Management approach for building climate resilience in the Caribbean Water Sector

Module 5: IWRM Approach.

UNESCO-IHE
Institute for Water Education

Goal and objectives of the session

- Emphasise the relationship between IWRM and Climate Resilience

IWRM and Climate Resilience

- An IWRM approach results in better water management
- Better water management results in a more resilient (climate resilient) system

IWRM and climate resilience

- Adaptation measures (Module 4) not done in a vacuum
- To be more effective adaptation measures need to be done within an IWRM Enabling environment
 - Stakeholder Consultation
 - Participatory approach
 - Using capacity building and awareness raising
- To be more effective and for easier implementation - Adaptation Measures need to be done within an IWRM Frameworks and processes
 - Water Policies
 - Plans
 - Institutions
 - Framework for collective planning and decision making

Thank you!
