

Global Water Partnership Central Asia and Caucasus (GWP CACENA)

Report

For March 2021

www.gwp.org

1. GLOBAL WORKSHOP ON BUILDING CLIMATE-RESILIENCE THROUGH IMPROVING WATER MANAGEMENT AND SANITATION AT NATIONAL AND TRANSBOUNDARY LEVELS

Date: 29-31 March 2021

Format: online

Organizer: UNECE

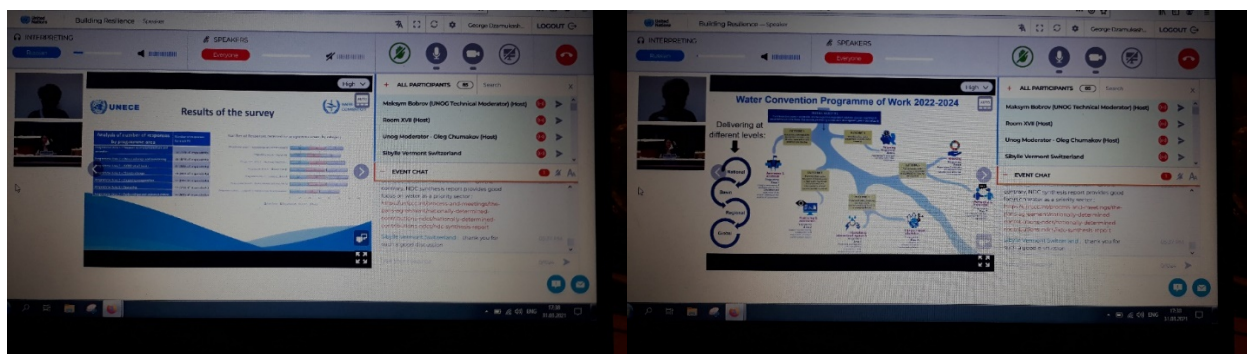

Participants: 120 people

The workshop had taken a holistic perspective on the impacts of climate change and extreme weather events on water resource management, both at national and transboundary level, and on water supply and sanitation systems and ultimately people's health.

The following issues were considered:

- Climate change impacts on water, sanitation and health;
- Protocol on Water and Health as a tool to address climate change impacts on water and sanitation through target setting and risk-based approaches;
- Water operators and climate change adaptation – why we need the involvement of all stakeholders to ensure resilient water infrastructures;
- Adaptation priorities for water and health under the United Nations Framework Convention on Climate Change;
- Operational Study on Integration of Water Supply and Sanitation into Climate Policy;
- Disaster risk reduction through transboundary cooperation;
- Water adaptation and resilience from a global perspective – putting water at the heart of climate to reach the SDGs in 2030.

CWP-Georgia was very interested in this workshop. On February 24th, CWP-Georgia held a HELP Consultation on Water-related Disaster Risk Reduction (DRR) during the Covid-19 pandemic in Georgia. In terms of raising awareness and expanding knowledge in this area, the workshop was useful.

2. CWP Accreditation workshops

Date: 23, 25 March 2021

Format: online

Organizer: GWPO

Participants: CWP-Georgia, CWP-Kyrgyzstan, CWP-Tajikistan, CWP-Kazakhstan, CWP-Uzbekistan, CWP-Armenia
(Total: 52 people)

Workshop 1 (23/3):

- Why do we have accreditation (brand – funding – credibility – knowledge exchange – use of GWP logo – accreditation vs FINCAPs)
- CWP Accreditation (new CWP; groupings that been active and now want accreditation; accreditation review)
- What is available to guide CWPs/RWPs/NS – HOW TO NOTES/Checklists/
- Responsibilities of Network Specialist, RWPs, CWPs
- Basic documentation that is needed and why. Template Statutes, explanation of terminology, GWPO Check-list, examples of frequent issues (individual members, member fees, segregation of duties etc)
- Work through some common issues and problems that arise (NS bring their own live accreditations & questions)

Workshop 2 (25/3):

Workshop 2 was formed using the experience from WS 1, most likely geared towards practical examples and exercises, as well as accreditation re-check

3. The final conference on “Localization of Sustainable Development Goal-6 in Armenia” project

The final conference on “Localization of Sustainable Development Goal-6 in Armenia” project was held in an extended format in “Dilijan Resort” hotel, Dilijan city on 12-13 March this year.

The main goal of the meeting was to introduce the obstacles to reach SDG6 targets, legal gaps, the Draft Strategy Paper with Program of Measures and organize a final discussion on these issues. In addition, the list of supporting programs based on Program of measures and the training needs assessment program have been discussed.

To remind,

- The Project was launched on 1 July 2020, and will be finalized on 30 April 2021.
- The project is implemented by Country Water Partnership NGO.
- The Project is funded by UNDP GoAL-Waters program, under umbrella of the Global Water and Ocean Governance Support Program.

The conference hosted the representatives of state authorities responsible for water sector different aspects, international agencies, members of the Project working groups, independent experts, legal consultants, as well as members of the National SDG Council. The international partners joined the conference online, and introduced the financing opportunities to reach SDG 6 targets within the frameworks of current and new projects.

The representatives of USAID and WB in Armenia introduced the projects financed by them in the water sector, the implementation of which can contribute to the improvement of SDG 6 targets

indicators. The representative of the GIZ/UNDP's EU4Sevan Project, funded by the Government of Germany, introducing the project goals and results, also highlighted the importance of the strategy development procedure to reach SDG 6 targets.

The main outcome of the project is the Strategy Paper and Program of Measures to reach SDG 6 targets, the draft versions of which are currently under circulation at the respective stakeholder agencies by the initiative of MTAI Water Committee.

The conference covered a number of questions and answers, and an agreement was reached on making amendments and addendums in the Strategy.

An extended discussion was held on the legal issues regulating this field, including the issue of adaptation of the EU legislation in Armenian context foreseen within the frameworks of the Comprehensive and Enhanced Partnership Agreement signed between the EU and Armenia (CEPA). In the water sector, in particular, the compliance of the water quality norms with that of the EU, improvement of monitoring system, are considered to be the major changes foreseen by the Agreement. This is also included in the Program of Measures to reach SDG 6 targets.

The UN representative Georgi Arzumanyan who is coordinating the project implementation process, highlighted the significance of the Strategy to reach SDG 6 targets and stated that the adaption of the document will contribute to the launch of even more important stage of implementation of measures, due to which the public can be supplied with better quality water and sanitation conditions at the same time preserving eco-systems, and implementing integrated water resources management through engaging public in this process.

The amendments and comments on the Strategy will be finalized by the Project team in a working format and will be submitted to the RA Government.

In addition to all the important issues, the Strategy will specify the members of the Standing Working Group to implement monitoring of the SDG 6 targets. This will in its turn establish a cooperation platform to introduce respective data on behalf of the country.

4. WASH (Water, Sanitation and Hygiene) project, funded by International Fund for Agricultural Development (IFAD)

CWP Armenia finished the project on awareness campaign in 29 rural communities in 7 marzes of Armenia in March.

The project was funded by “International Fund for Agricultural Development/IFAD.

Within the framework of the project, the following implemented:

- Conducting of needs assessment analysis in target communities
- Development and printing of information materials on water saving, modern water-saving technologies and gender.
- Development of training modules and organizing of awareness raising campaigns.

5. Meeting with President of Armenia Armen Sarkissian

Issues related to water resources and water security were discussed during the meeting of the President of Armenia Armen Sarkissian with the chairman of the public organization "National Water Cooperation" Arevik Hovsepyan, the chairman of the information public organization "EcoLur" Inga Zarafyan, the director of the company "Environment Group", the former Minister of Nature Protection Eric Grigoryan.

According to the press service of the RA President, noting that today our country faces numerous challenges caused by the war, the global economic crisis, the coronavirus pandemic, and many other reasons, Sarkissian considered water and food security problems, which are interconnected, to be no less important.

He stressed that given the global, regional development and security-related challenges, it is also necessary to think about the problems of water and food security. "The problems of water and food security are a priority for us, and we must pay great attention to these issues," the RA President emphasized.

The head of state expressed his readiness to listen to the opinions and proposals of specialists and experts dealing with the problems of this sphere, to find out what causes their concern, so that the presidential institute, if possible, would help popularize these problems, discuss and solve them. Representatives of environmental organizations considered these problems to be extremely urgent and presented their concerns. In particular, the importance of effective use of water resources, legislative and institutional decisions aimed at this, reassessment of resources in connection with climate change and scientific research of the processes taking place in this regard, as well as changes in attitudes towards the use of water resources, was emphasized.

Emphasizing the priority of effective water resources management in terms of ensuring food security, in particular, the interlocutors expressed concern about the lack of line ministries. It is emphasized that in the case of joint ministries coordinating several sectors, important problems receive less attention, dissolving into common problems. It should be noted that the well-known Armenian ecologist, specialist in water resources Knarik Hovhannisyan noted earlier in a conversation with ArmInfo that most of Armenia's reservoirs are not filled properly due to the fact that their technical condition leaves much to be desired.

The expert said that our reservoirs are in need of maintenance. She also expressed her conviction that Armenia has the necessary amount of water for consumption, and if it is used correctly, there should not be a shortage. Hovhannisyan said that a year on our territory, a water flow of about 7 billion cubic meters is formed, of which 3.8 cubic meters is surface runoff, and 3.2 cubic meters. m. - underground runoff, which is represented by high quality waters, which are used by households and industries. "But out of all this large mass, in a rough estimate, we use only 2.5 billion cubic meters. Everything else goes to our neighbors. That's the point. Therefore, you should not look at what is happening with the Turks.

These are their lands, they can do whatever they want. And we, in turn, must be able to build reservoirs, delay the flow that forms on our territory. If we manage to use our resources correctly, we are not in danger of any warming,

no "water hunger" ", - stated Knarik Hovhannisyan, stressing that the country's water policy should be reasonable and scientific. Today in Armenia there are about 90 reservoirs of different volumes and sizes, and in the next five years, judging by the government's plans, significant progress is planned in this area. It is planned to build 4 new large reservoirs.

A new reservoir will appear in Vedi - 29 million cubic meters, Yeghvard - 90 million cubic meters, Kaps reservoir - at the first stage - 25 million cubic meters, at the second - up to 60 million cubic meters, as well as on the Selav and Mastara rivers - 10 million cubic meters. All this will be carried out within the framework of credit programs and the costs of the programs will amount to about \$ 350-400 million. bank KFW, etc.

6. The working meetings of CWP-Kazakhstan Chairperson Prof. Nariman Kipshakbaev

Date: 1, 15, 18 March 2021

Place: Almaty, Kazakhstan

On 1 March 2021 - with Vice Minister of Ecology, Geology and Natural Resources and Director of the branch "Management of the Bartogayskoye Reservoir and the Big Almaty Canal named after D. Kunaev" of the Republican State Enterprise "Kazvodkhoz" discussed issues of cooperation on transboundary watercourses, the state of ecosystems, and the IWRM implementation in Kazakhstan.

On March 15, 2021- with the Deputy Director of the branch "Management of the Bartogai Reservoir and the Big Almaty Canal named after D. Kunaev" of the Republican State Enterprise "Kazvodkhoz" of the Ministry of Ecology, Geology and Natural Resources; a consultation was given on reconstruction of the Big Almaty Canal and on drawing up a Water Use Plan before the start of the growing season, by setting a limit for each agricultural producer for a certain period (day / decade / month).

On March 18, 2021 - with the acting General Director of the Republican State Enterprise "Kazvodkhoz" of the Ministry of Ecology, Geology and Natural Resources; consultation on preparing for the growing season and spring floods.

7. International online session Natural Capital and Sustainable Markets: A new holistic approach to the management of natural resources for extractive industry in Kazakhstan

Date: 19 March 2021

Place: Almaty

Format: online

Organizers: Kazakhstan Association of Natural Resource Users for Sustainable Development, BCSD Kazakhstan, PA "Network of Experts on Sustainable Development in Central Asia" and CWP-Kazakhstan"

Participants: experts on sustainable development, PWC KZ, representatives of mining companies and the Parliament of the Republic of Kazakhstan

Purpose: to exchange ideas on transformation of corporate governance and methods of interaction based on practical cases on preservation of ecosystems in Kazakhstan, as well as to understand the key environmental issues and business opportunities that come with an ecosystem approach to natural capital management.

The program included the following questions:

- 1) New paradigm of natural resources management;
- 2) Ecosystem approach to management - examples, situation in Kazakhstan, possible projects for business, population and other stakeholders;
- 3) Issues of natural capital management to maintain a stable market position in the extractive sector: next steps;
- 4) Activity for mobilizing resources, introducing new forms of interaction between stakeholders, supporting innovative solutions in management and technology in order to transform the economy and preserve critical ecosystems in Kazakhstan.

The broadcast with simultaneous translation was conducted on the YouTube channel:

in Russian: <https://youtu.be/lYyDXRGH8D4>

in English: <https://youtu.be/eLnZBJASLOE>

8. Talk show "Grani" (Boundaries)

Place: Kazakhstan

On March 8, CWP-Kazakhstan Deputy Chairman Anara Tleulesova took part in the talk show "Grani": "Threat of floods: why and what to do?". Representatives of the Ministry of Emergency Situations and the Republican State Enterprise "Kazhydromet" of the Ministry of Ecology, Geology and Natural Resources took part too.

<https://youtu.be/suLb6SGuXKI>

9. Discussion on draining wetlands on the shores of Lake Alakol

On March 29, the Atameken Business website published a discussion on draining 60 hectares of wetlands on the shores of Lake Alakol as part of measures to implement the State Program for the Development of the Tourism Industry of the Republic of Kazakhstan for 2019-2025, where CWP-Kazakhstan Deputy Chairman Anara Tleulesova took part. The discussion was organized by the alarm of environmentalists of Kazakhstan.

10. Workshop "GENDER ASPECTS OF NATIONAL CONTRIBUTIONS TO THE PARIS CLIMATE CHANGE AGREEMENT"

Date: 27 February 2021

Place: Bishkek, Kyrgyzstan

Organizers: UNDP, Aarhus center

Participants: civil society, public organizations, government agencies, the private sector, NGOs, scientific institutions and universities

Purpose:

- informing the civil society about the ongoing work on development of nationally updated contributions (NDCs) to the Paris Climate Change Agreement (PCCA);
- development of information materials in the media about PCCA and NDCs;
- creation of information videos and TV programs about PCCA and NDCs;
- creation of a working group on NDCs;
- training the working group to conduct quality monitoring, reporting and verification of actions on NDCs on mitigation in various sectors of government, economy and science.

Participants exchanged of experience on the results of the survey and reporting on NDCs in the Kyrgyz Republic.

11. Consultation meeting of experts and high-level leaders on water and natural disasters in Kyrgyzstan

Date: 26 February 2021

Format: online/offline (Bishkek)

Organizer: CWP-Kyrgyzstan

Participants: Ministry of Agriculture, Water Resources and Regional Development, Ministry of Emergency Situations, Ministry of Health and Social Development, Ministry of Transport, Construction, Architecture and Communications, State Agency for Environmental Protection and Forestry, Design and Engineering Technological Institute "Vodavtomatika and Metrology", Kyrgyz National Agrarian University, Aarhus Center in Kyrgyzstan, Secretariat of the Chu-Talas Water Commission, Swiss Agency for Development and Cooperation in the Kyrgyz Republic (Total: 60 people).

(the Report is attached)

12. Roundtable “Problems of institutional transformation of the water sector of Kyrgyzstan in the context of the COVID19 pandemic”

Date: 3-4 March 2021

Place: Bishkek

Organizer: CWP-Kyrgyzstan

Participants: governmental organizations, civil society

Purpose: Activation and strengthening of mechanisms of interaction and cooperation with state and other public organizations in matters related to water resources of the Kyrgyz Republic, and sharing useful experiences and jointly developing ideas to strengthen the capacity of national partners

13. Webinar "Applying a Gender Lens to Transboundary Waters"

Date: 31 March 2021

Format: online

Organizer: MEDRC (an International Organization mandated to find solutions to fresh water scarcity)

Purpose: Discussing water security issues and transboundary cooperation and methods of achieving the SDGs for gender equality in the water sector.

CWP-Kyrgyzstan took part in the webinar.

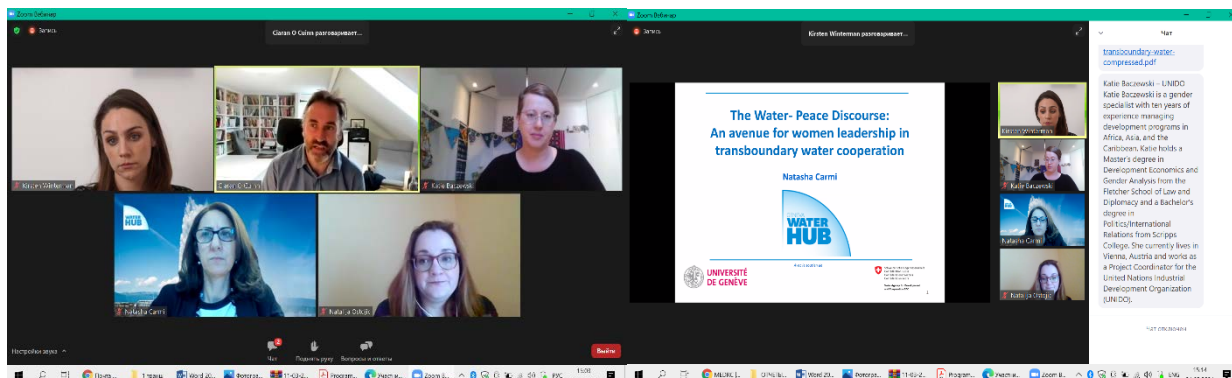

Invited Speakers:

Katie Bachevski - Project Coordinator, United Nations Industrial Development Organization (UNIDO).

Natasha Karmi - Lead Water Specialist, Geneva Water Hub.

Anamika Baruah - Professor, Department of Humanities and Social Sciences, Indian Institute of Technology Guwahati (IITG).

Natalia Ostojich - Project Technical Analyst, UN Women.

14. Workshop on Water/Health NEXUS and Gender Equality for Effective Water Management: challenges and opportunities in Central Asia and Afghanistan in a post-COVID World

Date: 15-16 March 2021

Format: online

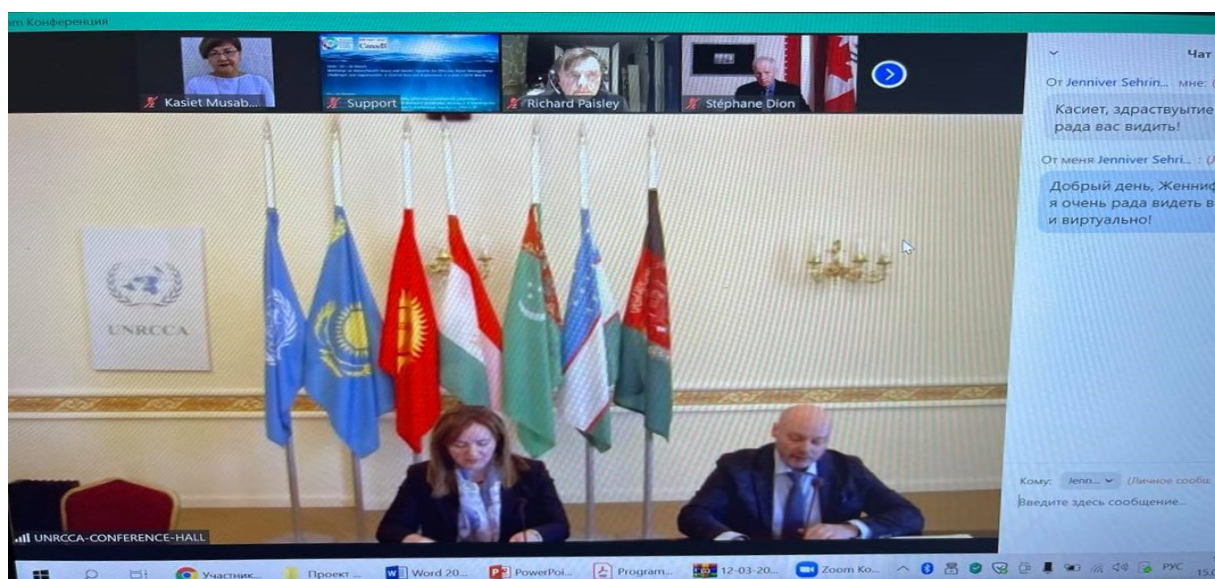

Organizer: UN Regional Center for Preventive Diplomacy for Central Asia (UNRCCA) in cooperation with the Government of Canada

Participants: Representatives of relevant ministries and departments of the states of Central Asia and Afghanistan

Purpose:

1. Reaffirm the regional cooperation importance and facilitate work on relevant regional agreements on transboundary water, energy and environmental resources in Central Asia and Afghanistan, especially the current problems associated with the COVID19 pandemic;
2. Identify ways to improve the effectiveness of the ongoing dialogue between states through the water/health nexus;
3. Identify ways to improve the efficiency of water resources management taking into account gender aspects.

CWP-Kyrgyzstan representative made a presentation “Gender aspects of effective water management in Kyrgyzstan under the COWID-19 pandemic”.

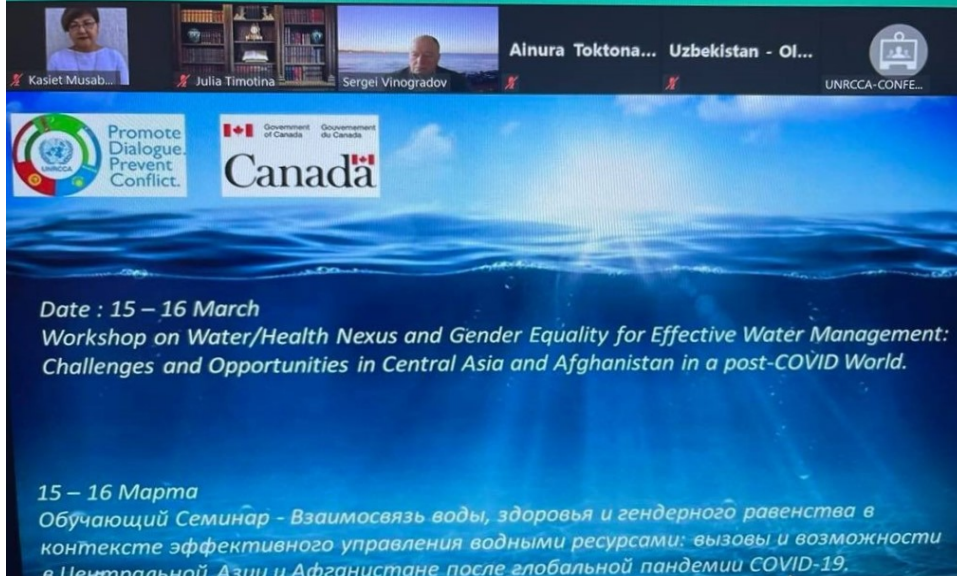

**ГЕНДЕРНЫЕ АСПЕКТЫ ЭФФЕКТИВНОГО УПРАВЛЕНИЯ
ВОДНЫМИ РЕСУРСАМИ КЫРГЫЗСТАНА В УСЛОВИЯХ
ПАНДЕМИИ COVID-19**

Мусабаева Касиет Акматовна, CWP Kyrgyzstan

Обучающий Семинар - Взаимосвязь воды, здоровья и гендерного равенства в контексте
эффективного управления водными ресурсами: вызовы и возможности в Центральной Азии и
Афганистане после глобальной пандемии COVID-19

Онлайн, 15-16 Марта 2021

The screenshot shows a video conference interface. At the top, there are three small video windows showing participants: Kasiet Musab..., Julia Timotina, and Sergei Vinogradov. To the right, there is a name tag for Alnura Toktona... from Uzbekistan. Below the video windows, there are logos for UNRCCA-CONF... and the Government of Canada. The main part of the screen displays the title of the workshop in English and Russian, along with the dates 15-16 March.

Date : 15 – 16 March
Workshop on Water/Health Nexus and Gender Equality for Effective Water Management:
Challenges and Opportunities in Central Asia and Afghanistan in a post-COVID World.

15 – 16 Марта
Обучающий Семинар - Взаимосвязь воды, здоровья и гендерного равенства в

в Центральной Азии и Афганистане после глобальной пандемии COVID-19.

15. International Conference "Climate Dialogues 2021"

Date: 31 March 2021

Format: online

Organizer: Climate Action Network Eastern Europe, Caucasus and Central Asia (CAN EECCA)

Participants: more than 100 participants from the EECCA countries

Purpose: to share experiences about local, national and regional climate actions, strengthen collaboration between organizations in the EECCA region and internationally to tackle the global climate crisis

"Climate Dialogues 2021" is a platform for civil society to discuss how to raise climate ambition in different relevant fields in the format of supported working groups.

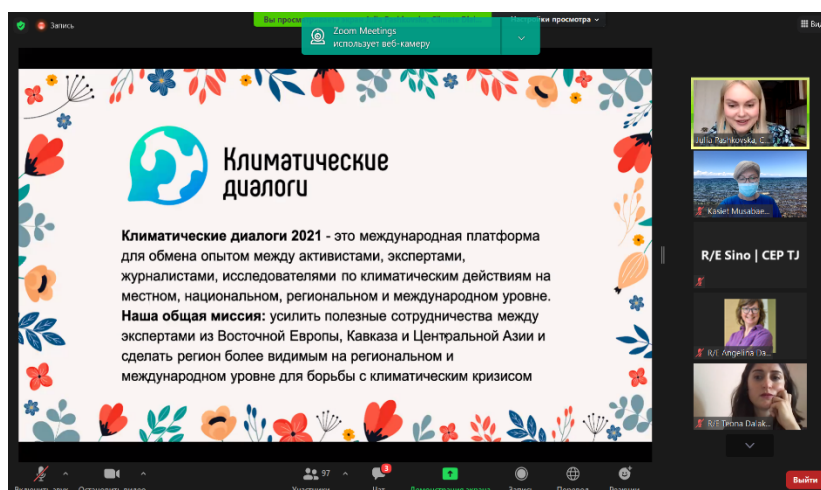

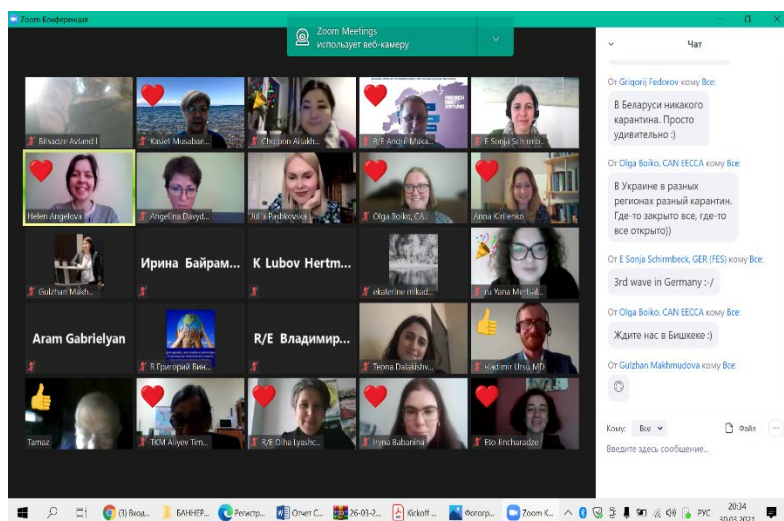

The CAN EECCA members are 59 NGOs from 11 countries (Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Uzbekistan, Ukraine).

The working groups were formed on the following topics:

- Renewable energy
- Education and outreach
- Climate policy
- Adaptation and biodiversity

- Cities and mobility
- Just transition

CWP Kyrgyzstan joined the working group "Education and outreach".

16. National online forum "GEOGRAPHY AND WATER EDUCATION"

Date: 22 March 2021

Place: Ulaanbaatar, Mongolia

Format: online

Organizers: Department of Mathematics, Mongolian State Pedagogical University, Department of Geography, School of Natural Sciences, Association for Geographical Education of Mongolia, Mongolian National Commission for UNESCO, Institute of Geography and Geoecology of the Academy of Sciences of Mongolia, CWP-Mongolia

Within the framework of the World Water Day 2021, the National Forum "Geography and Water Education" was organized for the third time.

Purpose: to bring to a new level the coordination of educational, research and scientific organizations in geography, to expand cooperation between teachers and researchers, to train specialists and teachers of geography and to identify ways to discuss and solve problems facing before the spread of Geographical education and science.

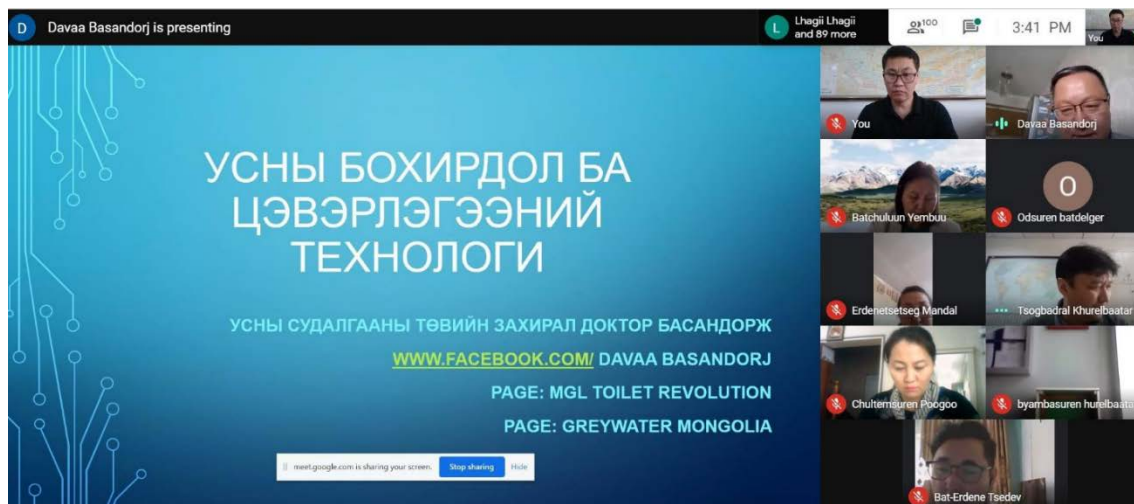

The forum motto is "Recognizing the value of water".

Participants: many foreign and domestic organizations, including Mongolian State University of Education, Mongolian National Commission for UNESCO, University of Science and Technology, Mongolian Center for the Protection of Natural and Cultural Heritage, McQuarrie University (Australia), Agricultural University, Khovd University, Educational institution, Institute for Advanced Training of Teachers, Pedagogical University of Inner Mongolia, Global Water Partnership Organization, Mongolian Association of Geography Teachers and the School of Geography, as well as more than 150 representatives of teachers of secondary schools.

At the opening of the forum, the greeting messages were made by Prof. E. Batchuluun, Faculty of Geography, Mongolian State Pedagogical University, S. Uyanga, Secretary General of the Mongolian National Commission for UNESCO, Dr. D. Battogtokh, Director of the Institute of Geography and Geoecology, O. Altangoo, Associate Professor, Mongolian State Pedagogical University. A video-message from the Director-General of UNESCO, Audrey Azoulay on the occasion of the World Water Day was presented too.

The forum discussed the following 6 presentations on geographic and water education, environmental traditions and heritage of water conservation of the Mongolian people, geographic education research results and challenges ahead:

1. "Geographic and Water Education: Current State and Trends" Ph.D. E. Batchuluun (Teacher of Moscow State Pedagogical University)
2. "Mongolian customs and traditions of water worship" prof. N. Urtnasan (Head of the Mongolian Center for the Protection of Natural and Cultural Heritage, Honored Worker of Culture of Mongolia)
3. "Water pollution and rational use of water resources" Assoc. Prof. D. Basandorj (Lecturer at the University of Science and Technology)
4. "Contribution of Dr. S. Dzhigdzha to geographical science", Doctor of Technical Sciences, prof. D. Dash (Lecturer at the Moscow State Pedagogical University)
5. "Improving the content and methodology of geography at the secondary school" A. Sansartuy (leading teacher of geography at the Erdmein Dalai complex school of the Khuvsgul aimag), S. Munkh-Otgon (geography teacher of the 1st Humuun school of the Arkhangai aimag)
6. "Presentation of the creative work of student-researchers" S. Delgermunkh (teacher of geography at the Olonlog Secondary School), MD, prof. S. Hadbaatar (teacher of Moscow State Pedagogical University)

The organizers, participants, teachers, students and co-organizers agreed to raise the level of water and environmental education.

The organizers, participants, teachers, students and co-organizers agreed to raise the level of water and environmental education.

The working group to handle the water education program "LOVE AND PROTECT WATER - THE SOURCE OF LIFE" on a large scale was created.

17. 15th student conference "Water and Development"

Date: 22 March 2021

Place: Agricultural University in Ulaanbator

Organizers: CWP-Mongolia, Ministries of Environmental Protection and Tourism, Water Agency of Mongolia, State Universities and the Mongolian Students' Union

Participants: more than 10 universities (56 people)

This conference was organized within the World Water Day 2021.

The aim of this conference is to attract attention of young people to the water problems, expand water partnerships and bring ideas on water problem solutions on a scientific basis. The conference was held between the national universities and this time the Agricultural University has lead and organized this event. CWP-Mongolia provided financial support and was the main organizer.

At the first stage 26 reports were accepted. Then 10 best reports representing different water problems in Mongolia were selected at the second stage. Three reports on development of IWRM, water saving and wastewater treatment, as well the construction of artificial ponds for adapting to climate change were selected to award. The jury consisted of 9 people, including CWP-Mongolia Chairperson Prof. Basandorj.

The Jury President announces awards for the best students

18. CWP-Mongolia's Awareness Raising activity

CWP-Mongolia launched an electronic newspaper in Mongolian language (attached) and announced a photo contest devoted to 25th Anniversary of Global Water Partnership.

19. Round table “Integrated water resources management in Tajikistan”

This roundtable was dedicated to the World Water Day-2021.

Date: 19 March 2021

Place: Dushanbe, Tajikistan

Organizers: CWP-Tajikistan, Institute of Water Problems, Hydropower and Ecology

Participants: young researchers and water specialists, as well as water scientists, ecologists, economists and other interested persons (Total: 31 people).

Purpose: to organize an information campaign on integrated water resources management and use for achieving SDGs-2030 in Tajikistan.

CWP-Tajikistan Chairman Professor Yarash Pulatov made a presentation "Principles of Integrated Water Resources Management".

Participants discussed the following questions:

- What is the difference between the IWRM principles and the principles of Integrated Use and Protection of Water Resources? How did IWRM come about, what is its history?
 - What is the advantage of the hydrographic management method over the administrative one?
 - What is the role of the public in the process of implementing IWRM principles?
 - Does IWRM imply a transition to the principle of decentralization and market relations?
 - What government support will there be?
 - How will the problems of irrigation and hydropower be solved by the economy and the environment?
 - What does social mobilization of water users mean?
 - How to implement IWRM principles in the context of climate change and water scarcity?
 - What is the relationship between IWRM and the Sustainable Development Goals (SDGs)?
- etc.

During the dialogue the speakers (Prof. Nosirov N., Prof. Kobuliev Z., graduate student Saidumarov S., researchers Kadyrov A. and Boev R.) noted the need to disseminate knowledge on IWRM by issuing a review taking into account best practices and scientific findings.

20. INTERNATIONAL CONFERENCE OF THE EASTERN EUROPE, CAUCASUS, AND CENTRAL ASIA NETWORK OF WATER MANAGEMENT ORGANIZATIONS “TRANSBOUNDARY WATER COOPERATION IN THE EECCA COUNTRIES: LESSONS LEARNED AND FUTURE DIRECTIONS”

Date: 2-3 March 2021

Place: Tashkent, Uzbekistan

Format: online

Organizer: UNECE Project “Support to the Network of Russian Speaking Water Management Organizations”
financed by the Government of the Russian Federation

CWP-Uzbekistan, its partners and CWP-Tajikistan took part in the conference.

The participants addressed the current issues of transboundary water cooperation, summed up annual results and discussed future tasks of the EECCA WMO Network.

(More information: <http://sic.icwc-aral.uz/releases/eng/349.htm>)

21. Round table "Strategy on IWRM principles implementation in the Republic of Uzbekistan"

Date: 10 March 2021

Place: Tashkent, Uzbekistan

Organizers: CWP-Uzbekistan, IFAS Agency, SIC ICWC

Participants: CWP-Uzbekistan's partners, key national bodies, NGOs

Purpose: discussing practical aspects of IWRM principles implementation in Uzbekistan.

www.gwp.org

The Global Water Partnership's vision is for a water secure world. Our mission is to advance governance and management of water resources for sustainable and equitable development.
