1. Implementation of the Paris Agreement: Gap Assessment

The reports on Implementation of the Paris Agreement were prepared by the following CWP's:

- Armenia
- Kyrgyzstan
- Georgia
- Mongolia
- Uzbekistan
- Tajikistan

The purpose of these reports are to provide a gap assessment in countries of CACENA region with the final aim to support GWP CACENA in the development of a WACDEP strategic planning document for the CACENA region.

The Global Water Partnership Central Asia and Caucasus (GWP CACENA) has hired an expert for Short Term Consultancy on Water, Climate and Development Programme in order to synthesize the results of a gap assessment that will be prepared in advance of the Pan Asia WACDEP meeting to be held in Colombo in September 2017. The findings of this document is intended to inform the development of the Pan Asia WACDEP by identifying gaps that could potentially be addressed through activities in the Pan Asia WACDEP.

The Uzbek report was published by CWP-Uzbekistan in Russian and English for wider dissemination among stakeholders.

2. Booklet on World Water Day 2017

A booklet on “World Water Day: Why Waste Water?” 2017 was prepared and published. Printed copies were distributed to beneficiary schools which took part in World Water day 2017 event “Why Waste Water?”

ԱՋՀ թիմը Լյուսա մարզպետարանում

ԱՋՀ-ի նպատակն է՝ Համախմբել աղբային ռեկորդը, անխնայ օգտագործումը, ջրային աղակազմի համապատասխան կառավարման սկզբունքների ներդրումն ու կրթամոդուլներ, երեք գործընթացում՝ ազատազեղ հասարակության մասնակցությունը:

Կազմակերպությունը պրոկտի «ԱՋՀ-ի սնուցում» Համազորանկազմի ստրատեգիաները կԱՋՀ-ի Հես կազմակերպում է կրթ սեղաններ, սեմինարներ, կոնֆերանսներ՝ նախնական սկզբունքների ներդրումն ու կրթությունը Հարցերին՝ ՏՊՀ-ի պայմաններում աղբային գործընթացի քաղաքացիները կազմակերպումն արտադրողի անգլիաները:

During the meeting the participants revealed challenges hindering participatory and effective water resource management in Ararat valley. As a result of a constructive discussion the identified water sector issues were classified into three categories – legislative, law enforcement practice and behavioral change. In the scope of the event a stakeholder analysis was conducted to identify the level of the latter’s impact on the project implementation.

6. The meeting on Phone Survey and SMS Polling Instruments

On August 15, 2017, in the framework of USAID-funded PURE-Water project, Vedi Town Hall hosted a meeting organized by Country Water Partnership, Armenia in cooperation with URBAN Development Foundation.

The purpose of the meeting was to introduce the Phone Survey and SMS Polling Instruments, the installation of which would allow the community residents of the Ararat Valley to contribute to the decision making process and monitoring of water resource management in their respective communities. The instruments will help to identify public opinion about the urgency of the issues in water resource management. Phone Survey instrument was introduced by Emin Zavaryan, Phone Survey expert from CWP Armenia and SMS Polling Instrument was presented by Zhanna Harutyunyan, UNDP expert.

The meeting was attended by the heads of communities of Ararat valley as well as respective IT specialists from each community.

8. International Joint Research Workshop on "Sustainable Public Health Requirement and Green Development of Ulaanbaatar Area in Mongolia"

Date: 9th of August 2017

Organizers: CWP-Mongolia and the Mongolian University of Science & Technology (MUST)

Venue: Conference hall of MUST

Purpose of the workshop: To explore and identify potential joint research projects between CWP-Mongolia, MUST, Ulsan National Institute of Science and Technology (UNIST), and University of Ulsan (UOU) which is contributing to public health improvement and green development of Ulaanbaatar city (with focus on GER area) in Mongolia in such fields of eco-system based approach including bio-toilet application, underground water contamination/waste water treatment, soil pollution prevention, solid waste management/treatment, and air pollution reduction etc.,

The workshop meeting began at 9:20 am with opening ceremony in which congratulatory speech was made by professor Uuganbayar, Azjargal and Basandorj. The meeting was attended by 40 participants including KOICA coordinator.

The morning session was chaired by professor Chung, Heukjin and afternoon session by professor Basandorj. The workshop meeting proceeded in a heated discussion and active participation atmosphere. The composition of the participants was also diverse in its background including NGO, international organization such as ADB, KOICA...

The most excited presentation was made by MET-ADB project manager Ms.Choikhand. She introduced an ADB environmental project initiated in July just last month with funding 22mil US\$ which is focused on the Ger area soil contamination. All participants welcomed the project and expressed their wishes to join the project because it has many elements in common among themselves. The meeting was closed at 5:30pm as planned.

Outcomes of the workshop:

Recognizing the importance of collaboration among themselves in order to work out pending serious problems such as soil contamination and air pollution facing Ger area major stakeholders agreed upon and committed themselves to take several important initiatives which is as follows:

ADB

Project manager Ms.J.Choikhand agreed and committed that ADB will take on board three stakeholders namely MUST, UNIST and UOU in its recently initiated project MET-ADB "Soil contamination management in GER area through improved on-site sanitation project" and as a follow-up;

1. it will provide all information on the newly initiated project to stakeholders by e-mail and ask them how to join and what contribution each stake holder can make for the project;
2. it will reorganize its project into a multi stakeholder joint project in such a way that each stakeholder shares responsibility and plays its part particularly in the area of bio-toilet technology development and application in the Ger area.

UNIST

Professor Jaewon Cho agreed and committed that UNIST will join and contribute to the above ADB project in terms of bio-toilet technology application in the Ger area and as a follow-up

1. it will provide its most advanced laboratory facilities for sampling analysis in case that any samples taken from Ger area is sent to;
2. it will consider to initiate a pilot project in order to test efficiency and practicality of the bio-toilet technology it has so far developed.

UOU

Professor Lee Byenog Kyu agreed and committed that UOU will join and contribute to the above ADB project in terms of visible photo catalyst degradation technology development and its application in the Ger area and as a follow-up;

1. it will provide information on how to reduce air pollution in Ger area by using research outcome of BK 21project;

2. it will cooperate with a Mongolian NGO who suggested use of solar energy as a solution to the air pollution problems of UB during winter time.

MUST

Professor Azjargal agreed and committed that SCEA will join and contribute to the above ADB project and as a follow-up;

1. it will play a role as coordinator and control tower of the multi stakeholder joint ADB project in consideration at the moment when it is established;
2. it will design and take samples for analysis of soil and underground water contamination and so on if asked by any stakeholder.

9. Knowledge & Learning in GWP - input from GWP CACENA

Under request of Ruth the K&L questionnaire was prepared by Regional Coordinator Vadim Sokolov.
