

## Integrated Drought Management in Central and Eastern Europe ACTIVITY LIST

### 1. BASIC INFORMATION

<b>Number of Activity</b>	Activity 7.1
<b>Title of the activity</b>	<b>Development of the Compendium of Good Practices</b>
<b>Duration of the activity</b>	February 2014 – June 2015
<b>Activity leader</b>	Gregor Gregorič (SLO)
<b>Chairman of the CWP</b>	Martina Zupan (martina.zupan@siol.net)
<b>Description of the activity</b>	
<p>Compendium of good practices will include a review of drought management projects implemented in European countries (not limited to participating countries). We will explore the existing documents about drought management across Europe. Some Drought Management Plans (DM plans) already exist and our goal is to analyse the current status of the existing NAPs and to represent them. These countries are Greece, Italy, Portugal, Spain and others. We will also analyse other existing drought policy and management documents besides DM plans of SE countries (Albania, Bosnia and Herzegovina, Bulgaria, Croatia, Macedonia, Hungary, Montenegro, Moldova, Romania, Greece, Turkey and Slovenia).</p> <p>We will contact focal points of DMCSSE and Activity leaders of current project – <i>Integrated Drought Management in Central and Eastern Europe</i> with interview about drought policy and management in their countries/regions/organisation. Cooperation with European Drought Centre, European Drought Observatory, DMCSSE, UNECE and other relevant institutions will be initiated.</p> <p>It is expected that activity leaders will contribute to this publication. Publication is envisaged as mix of existing information and accomplishments of this project. Mainly success stories from WP2 and WP5 are expected to be described in the publication.</p> <p>Publication will be compound of activities result from Integrated Drought Management in Central and Eastern Europe:</p> <ul style="list-style-type: none"> <li>• Review of the current status of the implementation of DM plans and measures within RBMP according to WFD;</li> <li>• Drought information exchange Platform;</li> <li>• Guidelines for Drought Management Plans;</li> <li>• Drought management by agricultural practices and measures-increasing soil water holding capacity;</li> <li>• Assessment of drought impact on forest ecosystems;</li> <li>• Natural small water retention measures;</li> <li>• Drought Risk Management Scheme: a decision support system;</li> <li>• Policy oriented study on remote sensing agricultural drought monitoring methods;</li> <li>• Upgrading agricultural drought monitoring and forecasting: the case of Ukraine and Moldova.</li> </ul> <p>Publication will be prepared by the end of June 2015. The publication, as an IDMP CEE knowledge</p>	

product, will link up with GWP knowledge management and especially GWP ToolBox. In addition, demonstration projects from the compendium will be developed into GWP ToolBox studies.

## 2. CONTRIBUTING ORGANIZATIONS / EXPERTS

Activity will not include partners from other countries/organisation/other experts.

The aim of this activity is to prepare a publication **Compendium of Good Practices**. Publication is envisaged as mix of existing information and accomplishments of this project. To achieve our goal we will create contacts with leaders from other activities to ensure the flow of information and results from activities.

## 3. PLAN for IMPLEMENTATION of the activity

<b>Name of the output</b>	<b>Good practice Compendium</b>
<b>Type of the output (analysis, report, guideline, workshop, brochure, etc.):</b>	publication
<b>Form (website, CD, printed, database, audio-visual, computer software, etc.):</b>	Printed, published on web page
<b>Purpose of the output:</b>	Publication is envisaged as mix of existing information and accomplishments of this project.
<b>Structure and description (contents, requirements for use, chapters, etc.)</b>	Compendium of good practices will include a review of drought management projects implemented in European countries (not limited to participating countries). We will explore the existing documents about drought management across Europe. Publication will be compound of activities result from Integrated Drought Management in Central and Eastern Europe. The Compendium will also include case studies and demonstration projects. Case studies will be developed into GWP ToolBox format.

Steps for implementation of the activity	Till when?	Who is responsible?
Time frame and detailed content of activity; presentation at the 2nd IDMP CEE Workshop	8-9 April 2014	Gregor Gregorič (Tanja Tajnik)
Analyse the current status of the existing Drought Management plans across the Europe and other existing drought policy and management documents besides Drought Management plans of European countries	August 2014	Gregor Gregorič (Tanja Tajnik)
Include information, results and good practices from IDMP CEE activities and demonstration projects; Develop case studies for GWP ToolBox	October 2014	Gregor Gregorič (Tanja Tajnik)
Preparing of publication (draft)	December 2014	Gregor Gregorič (Tanja Tajnik)
