

GLOBAL WATER PARTNERSHIP EASTERN AFRICA AT A GLANCE

Water Solutions for the SDGs
GWPEA supports the Country Water Partnerships and partners as an entry point to accelerate implementation of SDG 6 and other water-related goals towards Integrated Water Resources Management

Youth for Water Resources Management
GWPEA strives to include the youth in water decisions, offering pathways for youth to become agents of change for improved water resources management and sustainable development.

Climate Resilience Through Water
GWPEA supports to build Climate resilient livelihoods; societies and economies of Eastern Africa and Greater Horn of Africa

Food Security
GWPEA adopts climate adaptation mechanisms as part of solutions towards building food secure communities in the East African region

Transboundary Cooperation
GWPEA builds partnerships among sectors with the aim to enhance cooperation and reduce conflict over transboundary waters

Capacity Building
GWPEA develops and strengthens the skills, and leadership to adapt to the integrated approach to water resources management through its partners and CWPs

Engaging the Private Sector
GWPEA mobilizes the Private Sector to contribute towards building enabling environments, institutions, management tools, and finance for managing water resources

Knowledge Sharing
A number of guiding publications in different formats are freely accessible to stakeholders at all levels, advocating for the implementation of IWRM

Contributing to Gender Equality
GWPEA emphasizes diversity and inclusion, social equity, and women's role in the integrated and sustainable management of water resources.
