1.2 Type of procedure – Funding of project under procurement

Open procedure - CALL for OFFERS

The Assignment is funded by the Project ‘Making Water Cooperation Happen in Middle East & North Africa (MENA): Piloting Tangibles’, aka MENA Water Matchmaker 2 Project, that is supported by the Swedish International Development Cooperation Agency (Sida) through the Union for the Mediterranean (UfM), and is managed by the Global Water Partnership-Mediterranean (GWP-Med).

1.3 Assignment Scope - Description

The MENA Water Matchmaker 2 Project aims to equip UfM MENA countries with tangible and scalable local technical solutions, combined with employability capacitation as well as with selected applicable and shareable policy tools, for improved water management and climate resilience, through multi-stakeholder, multi-sectorial and gender mainstreaming approaches.

The Project’s main objective is to prove, through piloting, the integrated concept of applying Water-Energy-Food-Ecosystems (WEFE) Nexus technical solutions at local level while capacitating priority beneficiary groups on employment options, offering measurable and scalable contributions for further application in UfM MENA countries, and assisting the UfM

Water Agenda to enter and mark progress on tangible benefits at local level, while contributing to Sweden's Strategy for MENA 2021-2025.

The scope of the Assignment under the Call concerns the materialisation of the MENA Water Matchmaker 2 Project's technical intervention in Palestine that will be increasing the utilisation of the Wadi Al-Arroub Wastewater Treatment Plant outflow, powered by solar energy, for efficient irrigation while promoting entrepreneurship opportunities for local, particularly female, farmers in agribusiness. Working at the intersection of water engineering and crop cultivation science towards income generation, the Project's intervention in Wadi Al-Arroub will demonstrate the technical and economic feasibility of the WEF E Nexus approach coupled with low-cost and low-energy Nature-based Solutions for water treatment such as constructed wetlands, to upgrade the quality of treated wastewater prior to be reused in farming while contributing to the local water budget, thus decreasing consumption of potable water needed for domestic uses.
