

Folegandros to qsM

"Don't be fooled by the endless blue. In Folegandros I'm rare and invaluable."

Listen to the water. Save every drop.

In Folegandros, water is precious!

Natural water resources here are limited, while demand for water is very high, especially in the summer months.

The 'Zero Drop' water resources protection program saves more than 10 million litres of water annually and supports Folegandros' transformation into a model island with zero water losses.

New seawater boreholes were drilled to supply the island's 5 existing desalination units with more water for treatment.

'Zero Drop' is also empowering the local community with a view to improving water resources management, educating Folegandros's schoolchildren and providing capacity building activities and tools for the hospitality sector.

Aiming to promote innovation in the water sector for areas with limited water availability, 'Zero Drop' is introducing in Folegandros a new pilot technological application, which generates water by using only solar-powered water vapor condensers. Tapping into an unlimited water source. this application converts atmospheric moisture into high-quality drinking water.

Now, we need your help to save every drop of water in Folegandros!

Visit gwp.org/zerodrop to find useful water saving tips you can easily apply.

The 'Zero Drop' program is implemented by Global Water Partnership-Mediterranean (GWP-Med) with the support of The Coca-Cola Foundation, in collaboration with the Municipality of Folegandros.

"The tree lining this square with its shade needs me every single day to survive."

Listen to the water. Save every drop.

So, what can you do to help?

Is there anything more energizing than a cool shower after spending make it quick.

While brushing your teeth, turning off the tap makes all the difference.

Washing your hands frequently is a great way to keep germs away. But, please don't leave the water running while you're at it.

Do you change your towels and bed linen at home everyday? If not, why do it while on vacation?

Keeping your towels and bed linen for a few days more is a great way to help save water on the island.

"This wonderful island with its hospitable people draws its life from me.

Listen to the water. Save every drop.

a sunny day on the island's beaches? Remember, though, that showering for too long can waste a lot of water, so please
