Hosea Sanga

Professional Summary

Hosea S. Sanga is a member of the Tanzania Water Partnership (TWP) core team. He holds a Master Degree in Geo-information Science and Earth Observation specialization in Water Resources and Environmental Management from International institute for Geo-information Science and Earth Observation (ITC), The Netherlands. Mr. Sanga is a Founder and Director of a consulting firm - Upscale Innovations Company Limited which deals with Water Resources Development and Environmental Management. Mr. Sanga also holds a BSc. in Geology from the University of Dar es Salaam and has worked with Water Witness International (WWI), International Union Conservation for Nature (IUCN) and as a Local Consultant for the iMoMo (innovations monitoring and modelling for better Water Resources) consulting firm under the SADC funded Project in the Pangani river Basin. During his tenure with IUCN, he worked as a Project Officer for the Pangani River basin Project, based in Moshi. His tasks in the IUCN's lead project included providing leadership and testing, demonstrating and informing water resource management policy and practice, developing and implementing an effective monitoring and evaluation plan for IUCN's work in Pangani Basin with a strong focus on measuring and delivering conservation and livelihood outcomes. Mr. Sanga has also worked with the Ministry of Water at various capacities for eight years. While at the Ministry of Water, he played a key role in establishing and implementing a Water Sector Development Program as a Water Resources Expert. Mr. Sanga participated in the review and development of all the major management tools in the water sector such as the Water Resources Management Act (2009), the Water Sector Development Strategy, and the Water Sector Capacity Building Strategy.
