Dr. Victor Kongo

Professional Summary

Dr. Victor Kongo is an Independent Research Consultant and the leader of the Tanzania Water Partnership (TWP) team. He is a former employee of the Stockholm Environment Institute (SEI) - Africa Centre which was previously based at the Institute of Resource Assessment - University of Dar es Salaam. He has more than 15 years of diverse professional experience in research, consultancy and resource mobilization from different donors/sources in water, land resources management, agricultural growth and development. His experience is based on extensive and intensive field studies in different countries on various fronts in water, land, environmental management and development including Hydrology, Water quality, Water supply and sanitation, Environmental Impact Assessment (EIA), Environmental engineering, Agricultural water management, Climate Change, Renewable energy and Agricultural development. He has a good understanding, with broad knowledge, of the related policy, research, institutional framework and capacity building processes in integrated water and land resource management. Victor is a network builder and experienced in managing high profile stakeholder engagement processes, including influencing policy orientation through dialogue. He has sound experience on technical aspects of application of tracer isotopes, geophysical mapping, remote sensing, hydro-geological models and GIS in water and land resource management and in design/establishment of hydro-meteorological networks. Victor is an active member of various professional institutions, networks and associations and has won two scholarly awards in hydrology (2004 & 2007).
